-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 August 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7-13 and 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The term "having less reflection of electric wave" in claims 7 and 15 is a relative term which renders the claim indefinite. The term "having less reflection of electric wave" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 7-10, 12-13, and 15-17 are rejected under 35 U.S.C. 102(a) as being described by **Menache** (US 2004/0017313). **Menache** teaches (claim 7 and 15) test method for testing a vehicle collision prediction apparatus or a component thereof by using a dummy apparatus having a dummy object having less reflection of electric wave

and a reflection plate, which reflects a millimeter wave, attached to the dummy object (para 4, 11, 137, and 171), (claim 8) plural reflection plates are provided (fig 1), (claim 9 and 16) the reflection plate is displaced relative to the collision prediction apparatus (para 10 and 17) the reflection area of the reflection plate is changed with time (para 171), (claim 12) the dummy object is formed into a human (fig 1), (claim 13) the dummy object is covered with a cloth (fig 1).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Menache** as applied to claim 7 above, and further in view of **Aksyuk et al** (US 2004024588). **Aksyuk** teaches a reflection plate is deformable, and a drive apparatus for deforming the reflection plate is attached to the dummy object (para 19). It would have been obvious to modify **Menache** to include a reflection plate is deformable, and a drive apparatus for deforming the reflection plate is attached to the dummy object because it is one of multiple design choices with no new or unexpected results.
